reserving, in response to the user command, the upcoming program for future recording using the received program guide information.

D2
20. (ONCE AMENDED) The method of reserved recording in accordance with claim 16, wherein said reserving the upcoming program comprises reserving the upcoming program without retrieving stored program guide information from a memory.

D3
24. (ONCE AMENDED) A program recording device for reserved recording of an upcoming program while a program preview for the upcoming program is being broadcast, the device comprising:
a memory to store program guide information associated with the upcoming program;
a user interface to receive, during the broadcast of the program preview, a user command to reserve the upcoming program for future recording; and
a controller to reserve the upcoming program for future recording using the program guide information,
wherein the program guide information is not stored in said memory until the user command is received.

D4
29. (ONCE AMENDED) The program recording device according to claim 25, wherein the program guide information is not stored as it is received by said receiver unless in response to the user command to reserve the upcoming program for future recording.

37. (ONCE AMENDED) A computer readable storage medium encoded with a computer program to implement a method of reserved recording of the upcoming program while a program preview for an upcoming program is being broadcast, the method comprising:
receiving without storing program guide information associated with the upcoming

program;

receiving, during the broadcast of the program preview, a user command to reserve the upcoming program for future recording; and

reserving, in response to the user command, the upcoming program for future recording using the received program guide information.

43. (ONCE AMENDED) The computer readable storage medium in accordance with claim 37, wherein said reserving the upcoming program comprises reserving the upcoming program without retrieving stored program guide information from a memory.

46. (ONCE AMENDED) A method of reserved recording of an upcoming program while a program preview for the upcoming program is being broadcast, the method comprising: receiving the program preview including program guide information associated with the upcoming program;

displaying the program preview;

receiving, during said displaying the program preview, a user command to reserve the upcoming program for future recording while the program guide information is being received; and

reserving, in response to the user command, the upcoming program for future recording using the received program guide information without the program guide information being displayed.

50. (ONCE AMENDED) A method of reserved recording of an upcoming program while a program preview for the upcoming program is being broadcast, the method comprising:

receiving program guide information associated with the upcoming program;

using a user input interface having user selection keys to generate a user command to

reserve the upcoming program for future recording in accordance with a single action of one of the user selection keys being depressed to select and reserve the upcoming program; and
 reserving, in response to the user command, the upcoming program for future recording using the received program guide information.

51. (ONCE AMENDED) The method of reserved recording in accordance with claim 50, wherein the user command is generated in response to the single action of a user while the program guide information is not displayed.

52. (ONCE AMENDED) A computer readable storage medium encoded with a computer program to implement a method of reserved recording of the upcoming program while a program preview for the upcoming program is being broadcast, the method comprising:

receiving program guide information associated with the upcoming program;

receiving a user command from a user input interface having user selection keys, where the user input interface generates, during the broadcast of the program preview, the user command to reserve the upcoming program for future recording in accordance with a single action of one of the user selection keys being depressed to select and reserve the upcoming program; and

reserving, in response to the user command, the upcoming program for future recording using the received program guide information.

53. (ONCE AMENDED) The computer readable medium in accordance with claim 52, wherein the user command is generated in response to the single action of a user while the program guide information is not displayed.

65. (ONCE AMENDED) The program recording device according to claim 61,
